

Companion in Hygiene Solutions

TECHNICAL INFORMATION SHEET

7B OVEN SPRAY

Product Description

A highly alkaline detergent suitable for removing oils, fats and carbonised deposits.

Features and Benefits

- Suitable for use on ovens, hot plates, grills, griddles and other cooking equipment.
- Safe to use on stainless steel, mild steel, cast iron, vitreous enamel, ceramics, PTFE and most plastic surfaces.
- Not suitable for use on aluminium or zinc alloys.
- Highly alkaline formulation will remove even heavily carbonised soil.

Use Instructions

1. For best results remove loose soiling first.
2. For optimum efficiency warm up the oven and then switch off before application.
3. The surface temperature should be between 60 – 80°C, do not apply to surfaces that are greater than 80°C.
4. Spray an even layer of product to the soiled surface.
5. Leave for 5-30 minutes depending on the level of soiling.
6. Rinse off with clean water.

For particularly stubborn stains the use of a green scourer is recommended.

To avoid any white alkali residues wash off area with a mild vinegar solution (1 capful of vinegar / 5 litres of water).

Safe Handling and Storage

See visual information to right.

Full guidance on the handling and safe use of the product can be obtained from the Safety Data Sheet.

Store in original container. Avoid extremes of temperature.

Technical Information

Appearance: Clear yellow liquid

pH: >13.0

Relative density: 1.15

Odour: Characteristic

Solubility: Fully miscible in water

The above data is typical of normal production and should not be taken as a specification.

Materials Compatibility

Non corrosive toward mild and stainless steel, polythene, polypropylene and crockery. Corrosive, both at user concentration or undiluted on aluminium, zinc, tin, copper and their common alloys.
